

CMS: | each widget should
have an edit mode;
triggered by "edit" event.

→ Website should have several
versions:

online : • fetch data online
• login / edit mode.

offline : • fetch data locally.
• no login button.

CONCLUSION:

Global Variable:

- OFFLINE_MODE

used by • Login Widget

Login Widget: let enter

Pages needed:

(modifying and creating should be the same widget).

- Edit Paragraphs

- Edit Chapter

- Edit Page.

That's all!

Page:

- We do not use single image or video.
- A page describes an object or abstract element.
- A video is an abstract element and needs a separate page.
- Page contains:
 - Title: usually the name of the piece.
 - Text: the Etiquette corresponding to the piece.
 - Description: "huile sur toile du 3 juillet 1352. Dessinée avec le pied gauche, pinceau entre le 3ème et 4ème orteil!"

for later use,
no-one reads it!

Page DESIGN CONCEPT

Text may contain
links to other objects

ex:

Posg CMS DESIGN CONCEPT

The sketch shows a web browser window with a title bar, address bar, and content area. Annotations include:

- Title:** A rectangular box representing the title bar.
- Text:** A large rectangular box representing the main content area.
- add File. (picture or video):** A note pointing to a small icon in the address bar.
- link page or file:** A note pointing to a small icon in the address bar.
- Choose page to link:** A dropdown menu showing a list of pages (Page 1, Page 2, Page 3, Page 4) and a search bar.
- Choose file to link:** A dropdown menu showing a list of files (file 1, video 0, img 1).
- those depends on the selected page:** A note pointing to the 'Choose file to link' dropdown.
- SAVE CANCEL:** Two buttons at the bottom of the browser window.

Chapters

Per cows

difference with page,
only Pages can be added!

? Is it a good idea to
add chapters at the
chapter level?
